National Circuit Assembly Appoints New Director of Special Projects and Knowledge Management

GARLAND, TX — June 2020 — National Circuit Assembly, a provider of PCB, cable, and electro/mechanical manufacturing and test services to leading OEMs, today announced the appointment of Mr. Tommy Beauchamp as the new Director of Special Projects and Knowledge Management.

With three decades of professional technical operations and management experience, Tommy brings to the table a dedicated skillset that has produced many successful years in different fields of work.

“I’m inspired to be joining such a tremendous team of professionals,” Tommy said. “The commitment from every team member to our customers is a testament to the leadership within the organization. I am very excited about the direction of NCA and the vision for the future.”

Tommy is recognized for his proficient experience with unique marketing strategies, account management, leadership, customer service, and practical application. The combination of these skills provides Tommy with insight that will greatly help NCA work towards its goal of being the premier electronic manufacturing services provider with excellent customer experience.

“Tommy is an exceptional leader and thought manager and has a unique blend of technical and people skills,” NCA President Stephen Lehocky said. “Leading our special projects and developing our knowledge management are key elements to take NCA to the next level. Tommy’s ability to solve problems and manage data will propel NCA into the class of world-class manufacturing.”
